

30-Minute Python Chatbot Assignment

Healthy Habit Chatbot

Name	Talari Nithya Santhoshini
Register Number	99230041002

Objective

Build a simple rule-based conversational chatbot that follows the required flow: INPUT → PROCESS → RESPOND → REPEAT → EXIT.

Assignment Requirements

1. Asks the user's name before the main conversation.
2. Uses while True: to keep the conversation running.
3. Uses input() to receive messages.
4. Cleans input with .lower().strip().
5. Recognizes hello and hi, including variations through the in operator.
6. Answers at least three different topics.
7. Uses if / elif / else for decisions.
8. Uses break for bye or exit.
9. Uses the user's name in responses.
10. Provides a useful else response for unknown messages.

Python Code

```
name = input("What is your name? ")

while True:
    message = input("You: ").lower().strip()

    if "hello" in message or "hi" in message:
        print("Bot: Hi", name + "! How can I help with healthy habits?")

    elif "water" in message:
        print("Bot: Keep water nearby and drink regularly during the day.")

    elif "sleep" in message:
        print("Bot: A regular sleep schedule can help you feel rested.")

    elif "exercise" in message or "workout" in message:
        print("Bot: Try a simple daily walk or another activity you enjoy.")

    elif message == "bye" or message == "exit":
        print("Bot: Goodbye", name + "! Take care.")
        break

    else:
        print("Bot: I am not sure. Ask me about water, sleep, or exercise.")
```

Expected Flow

1. Enter name
2. Send a message
3. Chatbot cleans and checks the message
4. Chatbot responds
5. Conversation repeats
6. Type bye/exit
7. Chatbot responds and stops

Suggested Test Inputs

hello bot, WATER, sleep, workout, unknown topic, exit

Conclusion

The Healthy Habit Chatbot is a simple rule-based Python program. It accepts user input, identifies common healthy-habit topics, gives suitable responses, repeats the conversation, and exits when the user types bye or exit.
